

I am formally submitting my opinion of the attack on XM radio. I am a long distance commuter, Monday thru Friday. XM weather and traffic help me avoid lengthy delays from traffic and informs me of important weather information. Something I can get without all of the commercials. And information given to me 24/7 consistently repeated so I get it when I want. Not when a radio station has it scheduled. It is an extreme convenience. Please keep the paws of the FCC and lobbyists out of my business. XM is a paid subscription by me, not you. Radio of course is paid by the unforgiving.

Thank You,

Martin Powell
